

VOICE AMPLIFIER INSTRUCTION

Using your Voice Amplifier

Turn the power switch on, turn the volume dial up or down to increase or decrease the volume - decrease the volume to avoid distortion.

Using the Helmet/Headset Microphone

Plug the headset microphone cable into the "Mic" jack on the top of the Voice Amplifier (not in the "Line" jack). The suitable distance of the headset microphone is a 1/2 inch away from your mouth.

Wearing the Voice Amplifier

With the provided waistband, you can affix the Voice Amplifier to your waist. You can also adjust the length of the waistband. The Voice Amplifier also includes a removable belt clip for your convenience.

Charging the Battery

If the LED light is dim or off, the battery needs to be recharged. Turn off the Voice Amplifier, plug the power adapter into the charging port of the Voice Amplifier, then plug the power adapter to a 110v power source. When the recharge process is completed, the LED changes from blinking green and red, to solid red. To extend battery life, make sure to recharge every time the battery is completely drained.
