- SWBA® Operator

Mode:

Practical workshop

Duration:

4 hours

Best practice for operators

3

INSTRUCTOR

Pre-requisites:

- SWBA® Specialist
- See Good Practice Guide

Mode:

Practical workshop, briefing and supervised delivery.

Duration:

2 days

Certified by PSI Global

WRBA®

CERTIFIED TRAINING LEVELS

Certified Training is one of the three core requirements for the safe implementation of SWBA including the Tiger WRBA), along with using only type-approved devices and operating these in accordance with the SWBA® *Good Practice Guideline*. Certified training from operator to instructor level is exclusively available online through Public Safety Institute and its global network of certified instructors. Certificates and patches are available for these three levels. A recreational version for paddlers is also available.

WHAT IS WRBA® ?

WRBA provides advanced surface-level respiratory protection against the drowning process for water rescuers including boat crew operating in challenging aquatic environments such as swiftwater, floods and low head dams.

Easy

Standardised online learning makes operator certification easy and accessible around the world.

Trusted

The use of the SWBA® trademark for training is exclusive to our global network of certified instructors.

Multi-lingual

Online available in over 50 languages, videos use multi-lingual closed captions, and global pool of instructors able to speak over 10 languages.
